SUMMARY

Safety-oriented Surveying and Field Engineer with a diverse portfolio spanning Oil & Gas, Infrastructure, and Residential Development projects. Certified in **H2S & SCBA** safety standards, with a strong operational focus on Permit to Work (**PTW**) compliance and hazardous environment protocols.

My expertise includes executing high-precision topographic surveys, pipeline route planning, and geospatial data analysis using advanced GNSS, Total Stations, and GIS/Civil 3D software. Proven track record of collaborating with real estate developers and international contractors to deliver accurate, quality-assured results. Skilled in leading field crews and optimizing workflows to meet strict project deadlines and HSE regulations

PROFESSIONAL EXPERIENCE

Surveying Engineer | Al-Rawabi Real Estate Development Group

Core Responsibilities

- **Earthwork & Quantity Surveying:** Performed precise earthwork volume calculations and quantity take-offs to ensure cost-efficiency.
- **As-built Documentation:** Conducted comprehensive As-built surveys for critical infrastructure, including water reservoirs, electrical networks, sewage systems, and road pavements.
- **Large-Scale Data Inventory & Asset Assessment:** Led a comprehensive technical inventory for the Empire Downtown residential project (800+ units). Categorized and documented the construction status of each property, ranging from strip foundations and damp-proof courses (DPC) to full structural completion (roofing and wall construction), providing a critical database for project revival and development.
- **Precision Leveling:** Executed high-precision leveling and structural weight distribution checks for buildings prior to concrete pouring.
- **Geodetic Control:** Established and corrected site Benchmarks (B.M) and secondary control points for reliable site referencing.
- **Team Support & Mentorship:** Acted as a technical lead, providing guidance, training, and development support to field crews to enhance productivity and safety.

Surveying Engineer | Sicim | West Qurna (phase 2) contract area project.

Core Responsibilities

- **Pipeline Route Execution:** Executed high-precision topographic surveys for a 17-km dual pipeline network connecting Well Pad 4 and Well Pad 9, ensuring strict adherence to EPC design limits.
- **Geodetic Network Establishment:** Established and verified 12 primary Benchmarks (B.M) along the dual routes using GNSS Static surveys and precise leveling, providing a stable and accurate reference for all subsequent construction phases.
- **Civil 3D & GIS Integration:** Leveraged AutoCAD Civil 3D and GIS to process raw field data, generating detailed alignment sheets and longitudinal profiles to identify potential infrastructure clashes.
- **Data Analysis & Quality Control:** Performed post-processing of survey data to ensure millimeter-level accuracy, collaborating with QC teams to prepare comprehensive survey reports and as-built documentation.

Surveying Engineer | HAZRAF engineering

Core Responsibilities

- Worked as a Survey Engineer, collaborating with the project manager and QC engineer to set out precast elements and prepare as-built drawings upon project completion.
- Prepared preliminary and final reports, including as-built drawings using Civil 3D
- Collaborated with the mechanical team to provide elevations and determine the direction of pipelines.
- Worked with the project manager to complete the Alignment Sheets for a 14-inch pipeline project, including the final output and finding solutions to issues related to the pipeline route.
- Collaborated with the mechanical QC team to survey the joints and prepare related surveying reports.

FTTH Survey and Design Engineer | FiberX IQ Company

Core Responsibilities

- **Network Design:** Developed comprehensive designs for the optical cable network in Basra Governorate, ensuring optimal coverage and efficiency.
- **Implementation Monitoring:** Oversaw the implementation of the network design, coordinating with field teams to ensure adherence to project specifications and timelines.
- **Collaboration:** Worked closely with project managers, engineers, and other stakeholders to align project goals and resolve any design or implementation issues.
- **Documentation:** Prepared detailed project documentation, including design plans, progress reports, and final as-built drawings.
- **Quality Assurance:** Conducted site surveys and inspections to verify the quality and accuracy of the network installation.

Experience Summary

- Total Stations
- Global Navigation Satellite Systems (GNSS) Receivers
- Computer-Aided Design (CAD) Software
- Photogrammetric(Software)
- GIS

EDUCATION

B.Sc. in Surveying Engineering

University of Baghdad | College of Engineering

Oct 2019 – Oct 2023

Diploma in Surveying Al-Furat Al-Awsat Technical University | Samawah Technical Institute

The First Student In My Class / GPA = 82.73%

Oct 2017 – Oct 2019

COURSES & CERTIFICATES

- Technical & Digital Engineering
- H2S & SCBA Training: Safety standards for hazardous environments, Certificate No: STC-SB0014 (Expires: Jan 2026).
 - Building Information Modeling (BIM): Professional certification in BIM methodologies and workflows (Issued: Sep 2025).
 - Autodesk Construction Cloud (ACC): Specialized training in Autodesk Build for digital project management via Autodesk Authorized Training Center (Oct 2025).
 - Coordinate Reference Systems & Spatial Data Representation: GIS and Earth Observation University (2023).
 - AI & Microsoft Copilot for Productivity: Specialized training in AI-driven data analysis and automated workflows (2024).
- Management & Strategic Leadership
- Project Management Professional (PMP) Training: Comprehensive 35-hour program covering modern project management methodologies and value-driven leadership (Aug 2025).
 - Strategic Management Professional: 30-hour course focused on Strategy Formulation, Implementation, and Evaluation (Nov 2025).
 - Mastering Risk Identification: Applied workshop in early-stage project threat recognition and opportunity assessment (Aug 2025).
 - Project Management Specialization: Focus on Budgeting, Risk Management, and Team Leadership (Microsoft/LinkedIn, 2024).
 - Microsoft 365 Certified Specialization: Advanced proficiency in workflow optimization and collaboration (2024).
 - Building Resilience & Professional Adaptability: LinkedIn Learning (2024).

FEATURED SKILLS

- Technical Surveying & Engineering
- High-Precision Surveying: Topographic mapping, Geodetic control (BM establishment), and Earthwork quantity calculations.
 - Infrastructure & Utilities: Expert in As-built surveys for pipelines, water reservoirs, and electrical/sewage networks.
 - Construction Layout: Expertise in structural leveling, weight distribution checks, and setting out for residential/industrial projects.
 - Data Inventory: Technical auditing and large-scale asset data collection.
- Software & Digital Tools
- Engineering Design: AutoCAD Civil 3D, ArcGIS (ArcMap), and Global Mapper.
 - Data Analysis: Advanced Microsoft Excel (AI-driven data analysis), and Microsoft 365 Copilot.
 - Geospatial Management: Post-processing of GNSS data and GIS database management.
- Field Equipment
- Surveying Instruments: Proficiency in GNSS (Static & RTK), Total Stations (Leica/Trimble), and Precise Digital Levels.
- Operational & Safety - Oil & Gas
- HSE Compliance: Certified in H2S & SCBA; strict adherence to hazardous environment protocols.
 - Work Management: Proficient in Permit to Work (PTW) systems and safety reporting.
 - Technical Reporting: Drafting comprehensive survey reports, alignment sheets, and QA/QC documentation.
- Leadership & Soft Skills
- Team Leadership: Experienced in supervising field crews, mentorship, and coordinating multi-disciplinary teams.
 - Problem-Solving: Strong ability to resolve field discrepancies and optimize work efficiency under pressure.

LANGUAGES

Arabic: Native Tongue.
English: Professional Working Proficiency
